-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 6, 8-11 and 13-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brockhaus, US Patent 4,800,623, in view of Thomas et al., US Patent 4,938,496.

Brockhaus provides a vehicle hinge assembly for hinging a vehicle door on a vehicle body, the assembly comprising a first hinge leaf 3 hingedly connected to a second hinge leaf 1 by a pivot pin 13, the pivot pin being immovably mounted in one hinge leaf and being rotatably mounted in, and being axially withdrawable from, the other hinge leaf, and hinge pin retention means 31 associated with said other hinge leaf for preventing axial withdrawal of the hinge pin therefrom, the hinge pin retention means having hinge pin engagement means movably mounted on said other hinge leaf for movement between first and second positions, and in

its second position being spaced from the hinge pin to permit its axial withdrawal from said other hinge leaf.

Brockhaus provides the claimed invention except the engagement means including a spherical surface of a given radius seated in an annular groove of a curved section, as claimed. It is known in the art of connections to use such structure to secure one element relative to another. Thomas provides such structure (see figures 1 and 3) at element 23. It would have been obvious to include such structure in the design of Brockhaus, for the purpose of providing alternative means of securing of the hinge pin as desired.

Response to Arguments

3. Applicant's arguments with respect to the claim of record have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

This action is non-final.
